

DICTUS®

— *The Dictus Band* —

The Dictus Band gives users with muscular weaknesses confidence and freedom

The Dictus Band helps thousands of people suffering from weak muscles and disabilities to lift their foot and/or leg sufficiently, to re-discover an active lifestyle.

The magic is a rubber band that supports and eases the lifting of the foot or leg in the gait cycle.

In this brochure you will find the different Dictus models that each have great features to provide the lifting support needed.

The Dictus Family:

- Gives the user confidence and freedom by reducing the risk of stumbling and falling.
- Helps the foot lift and leg swing phase – supporting the balance and a more natural gait.
- Is made from durable soft and amenable leather.
- Has rubber bands supporting the flex and lifting.
- Is a discreet aid that is suitable for use with most type of shoes as well as giving the possibility to use indoor without shoes.
- Can be worn over ordinary, or under loose clothing.
- Have models available for both adults and children.
- Is universal – can be used on both sides.

Find more information about Dictus at www.erimed.se, or through your local distributor.

Dictus Indoor

Many Dictus users prefer not to have to wear shoes indoors as well. Then the Dictus Indoor is perfect. The separate indoor device is to be used together with Dictus Original or Dictus Flex. It is also a standard part of the Dictus Hip-Foot device.

Dictus Indoor consists of a soft durable leather cuff with two plastic hooks. It is to be put on the forefoot and linked to the rubber band and ankle device for lifting support.

For details on the Ankle device – please see Dictus Original and Dictus Flex.

530300-111	DS-03L	DS-03R Dictus Indoor Left	ea	Adult left

Dictus Original

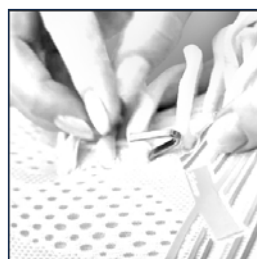

Dictus Original is a fantastic foot drop device that has been on the market for over 20 years, providing thousands of people help when having weakened foot flexion situation caused either by injury or a disease.

Dictus Original consists of a soft leather band that is attached to the ankle by velcro straps. On to the ankle band a rubber band is attached, connected to hooks on the shoe. You can choose either the mono-hook or two steel hooks.

You can also use Dictus Original with an indoor device described on page 3.

The rubber band shall always be mounted so that the seam of the rubber band is in the D-ring on the ankle band in order to ensure minimal force to the seam. It can provide extra lifting support by being twisted, and there are also spare rubber bands in other lengths available.

With the Dictus Original set comes duplicate rubber bands and two sets of steel hooks to ensure a long term use of the device. If you would like to give the Dictus Band another color, it is easily fixed with a Cover Sock. Beige is available as standard.

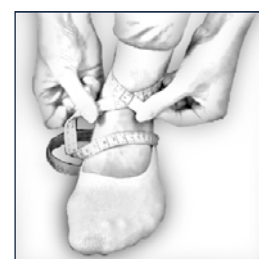

Dictus Original – available parts

Dictus Flex

Dictus Flex is a development based out of Dictus Original. It is a fantastic foot drop device, providing great support to people having a weakened foot flexion situation caused either by injury or a disease.

Dictus Flex consists of a soft leather band that is attached to the ankle by velcro straps. The outer fabric of Dictus Flex makes it possible to fasten Velcro pads with an attached rubber band. The rubber band is pulled through a central D-ring, and then attached to hooks on the shoe. You can choose either the mono-hook or two steel hook.

You can also use Dictus Flex with an indoor device described on page 3.

The lifting power can easily be adjusted by pulling and changing the Velcro pads on the Ankle band.

With the Dictus Flex set comes duplicate rubber bands and two sets of steel hooks to ensure a long term use of the device. If you would like to give the Dictus Band another color, it is easily fixed with a Cover Sock. Beige is available as standard.

Dictus Hip-Knee

- Dictus Hip-Knee is an orthopaedic aid to support users with weakness in the hip flexor and upper leg caused by a disease or trauma.
- It helps hip flexion and lifting of the upper leg, giving power to the leg, as well as a better gait and movement control.
- It fits both sides (universal) and with the smart belt hooks you have the possibility of a flexible placement of the rubberband supporting different lifting directions as needed.

Dictus Hip-Knee comes in two different sizes supporting waist measures from 55-130 cm – thus suitable for a wide range of individuals.

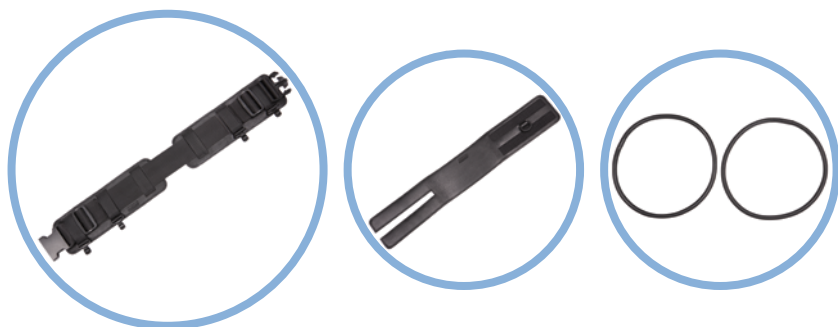

A standard size rubber band is included in the package, however – there is also a shorter rubberband available as spare.

For individuals with large or swollen thighs there is also a spare XL thigh band available.

To support users where the hip belt is falling down under the belly or users who need extra care for belly parts – there is a spare suspender available.
